ORCID 0000-0002-6155-3712

Born June 26, 1998

Updated October 2026

Profile

Ph.D. student at KAIST researching reinforcement learning for autonomous robotic systems, particularly unmanned aerial vehicles. Research interests also include robotic perception, state estimation, and multi-robot systems.

Education

2025 - Present	Ph.D. Student in Mechanical Engineering Korea Advanced Institute of Science and Technology (KAIST)
2025	M.S. in Mechanical Engineering Ulsan National Institute of Science and Technology (UNIST)
2023	B.S. in Mechanical Engineering Ulsan National Institute of Science and Technology (UNIST)

Research interests

Reinforcement learning / Autonomous UAVs / Robotic perception / State estimation / Multi-robot systems
